MEMORANDUM FOR THE RECORD

SUBJECT: Early Retirement Program

Bureau of the Budget has told John Clarke that they consider it extremely important that they, at Bob Amory's level, have a chance to go over our regulation on the early retirement program prior to its being considered by the Committees on the Hill. This has to do with the executive prerogative problem, in that they want to set the regulation as the Executive Branch wants it so they, in effect, get around the approval by the Committees. This will need some thought and some working out.
